ABOUT US

The European Marine Observation and Data network (EMODnet) is a network of more than 150 organisations working together **to observe the sea, process the data according to international standards and make that information freely available online as interoperable data layers, data products and services.**

New contributors are joining the network regularly and we invite your company to join also.

EMODnet works closely with other marine knowledge providers, including the marine component of the EU's Copernicus programme and will continue to strengthen its collaboration with the private sector to bring our activities closer to users and the market.

This **'collect once and use many times'** philosophy is part of the EU's effort to support sustainable growth in the maritime economy. Our European marine data sharing policy already saves costs to offshore and coastal business and offers a range of new opportunities for innovation and blue growth. **Join us and benefit too!**

Get value from ocean data

EMODnet for business: A wealth of marine data, products and services to support your company

EMODnet.eu

OUR SERVICES

EMODnet provides easy and free access to marine data, metadata, data products and services spanning seven broad themes: **bathymetry, geology, physics, chemistry, biology, seabed habitats and human activities.**

EMODnet turns marine data into maps, digital terrain models, time series & statistics, dynamic plots, map viewers and other applications. **Find the product that meets your needs and create value from data!**

Through EMODnet's data portals, users have access to standardised observations, data quality indicators and processed data products, such as basin-scale maps.

"EMODnet is now a reference source of data for those working in the coastal and offshore blue economy. It is already improving the forecasting of storm surges and helping national and regional authorities develop spatial plans and report the state of their marine environment."

- Karmenu Vella
Commissioner for Environment, Maritime Affairs and Fisheries

THE BENEFITS

1 Save costs

Collecting marine data can be very costly. By providing access to already existing marine data, EMODnet improves offshore business' and operator's efficiency and saves costs in gathering and processing marine data for operational and planning purposes.

2 Develop new products and services

By providing harmonised open data and products, EMODnet offers the material from which innovative start-ups and companies can leverage new products and services, or improve existing ones.

3 Add value to your own data

Enrich your company's data with datasets available via EMODnet and generate better information to plan and implement your business activities.

4 Improve knowledge and reduce risks

EMODnet data resources are essential for your maritime investment decisions as they help to reduce uncertainty and improve our ability to forecast the behaviour of the sea. They also help you to understand and respond to the impacts that climate change may have on your business.

Why use EMODnet and get involved:

- EMODnet provides **easy access** to harmonised, transboundary, multidisciplinary data layers that can support businesses operating across different jurisdictions.

- EMODnet assists national, regional and local government agencies to **seamlessly share and reuse marine open data across European borders.**

- EMODnet provides a platform to share your data and data products in support of Europe's maritime economy. **Submit your data and get better quality products in return via the EMODnet Data Ingestion Portal** (www.emodnet-ingestion.eu). It's free of charge!

- Benefit fully from EMODnet's expertise, activities and resources and join EMODnet as an **Associated Partner**. More info: http://emodnet.eu/emodnet-associated-partners

- **Gain visibility** for your company by telling us how you use EMODnet resources. Contact us at secretariat@emodnet.eu.
